- An interface can extend <u>multiple</u> interfaces
- A Class can implement <u>multiple</u> interfaces

UKSecStandards
7();
8();

Bank
1();
2();

Company
3();
4();

extends

extends

FinancialInstitution
5();

implements

implements

HSBC
1(){ };
2(){ }
3() { };
4() { };
5(){ };
7() { };
8(){ };

Barclays
1() { };
2() { };
3() { };
4() { };
5() { };

Multiple Inheritance with <u>interfaces</u> is allowed in <u>Java</u>
